

Manager Request – HR Analytics Dashboard

From: HR / Management

To: Data Analyst

Objective: Build an HR dashboard and provide a short analytical summary to help management understand workforce issues and support decisions.

Business Questions

- Identify which departments and job levels have the highest attrition.
- Check whether overtime, sick leave, or attendance patterns are linked to low engagement or weak performance.
- Evaluate whether compensation and promotions are aligned with role, level, and performance.
- Identify teams or managers associated with low manager satisfaction or higher turnover.
- Highlight employee groups that may be considered high-risk or require management attention.

Required Analysis

- Provide an overall workforce overview (headcount, department mix, level mix, attrition status).
- Analyze attrition by department, job level, manager, and time period.
- Analyze attendance and workload (working hours, overtime, sick leave, travel).
- Analyze compensation (salary, bonus, stock options) and flag any unusual or unfair patterns.
- Analyze engagement and performance trends over time and identify possible root causes.

Expected Deliverables

- One HR Analytics dashboard with clear KPI cards, trends, and drill-down views.
- One short findings summary (1–2 pages) highlighting key issues, root causes, and recommendations.
- A brief data quality note listing major limitations, missing values, outliers, or inconsistencies.

Key KPI's

• Headcount | Attrition Rate | Avg Salary | Avg Bonus | Avg Performance Score | Promotion Rate | Avg Manager Satisfaction | Avg Overtime | Avg Sick Leave

Suggested Dashboard Pages

• Executive Overview • Attrition & Retention • Attendance & Workload • Compensation • Engagement • Performance & Promotion • Data Quality

Priority

Focus first on attrition, manager impact, compensation fairness, and the relationship between workload, engagement, and performance.
